IN THE SPECIFICATION

Please amendmend paragraph [0049] as follows:

[0049] FIG. 3 illustrates a design-~~tem~~time folder group hierarchy 300 comprising exemplary design-time folder groups. In forming a hierarchy of design-time folder groups, a user creates a design-time folder group definition. The design-time folder group definition creates a basic hierarchy from which dynamic folders are created as needed by system 10. The design-time folder group hierarchy 300 comprises the following design-time folder groups: area 305, organization 310, address 315, collaboration 320, personname 325, affiliation 330, and companyname 335, referenced collectively as design-time folder groups 340. The design-time folder groups 340 represent an organization of a collection of documents within a predetermined folder hierarchy. The design-time folder group hierarchy 300 comprises the design-time folder groups 340 and the organization of the design-time folder groups 340 into a hierarchy.

Please amendmend paragraph [0168] as follows:

[0168] External variable definitions in query languages allow values to be provided by the external environment. Consequently, the atomic-valued queries of the design-time folder group definitions can be parameterized queries. The values of the variables are added to the evaluation context before the derived query is evaluated and documents in the dynamic folders ~~be~~ retrieved. For example:

Please add the following new paragraph after paragraph [0213] as follows:
